Science4Peace Forum

News

- The events in Syria last week should make us not forget:
 - there is still bombing going on in Syria from US, Israel, Turkey
 - former “terrorist groups” become “friends” (of whom ?)
 - there is still bombing going on in Gaza and Lebanon, despite ceasefire
 - war in Ukraine is still going on
- We should also not forget, that Militarization at universities and research institutions in western countries, especially in Germany is going on
 - with goal to be ready for war in a few years !
- All this is frightening, and needs our attention and activity, also next year
 - and prospects for the coming years are challenging !

Announcement

Science4Peace at CERN and DESY

A birthday contribution

18 December 2024, 5 pm (CET)

ZOOM only

<https://us02web.zoom.us/j/87653470277>

Contributions:

- Dr Hannes Jung (DESY):
 - Science4Peace at DESY
- Dr Hartwig Spitzer (Hamburg University)
 - The scientists peace initiative at Hamburg and the big Conference "Ways out of the arms race 1986"
- Dr John Ellis (King's College London)
 - Science4Peace at CERN

Science4Peace Forum

Support for Palestinian students

Following last discussion with Ahmed Bassalat (Nablus University), S4P will start a [donation campaign](#) to support physics students at Nablus University:

Science4Peace Fund

Contributing to university fees for Nablus physics students

The Science4Peace Forum (S4P international) is committed to use the language of science to build bridges across borders and to communicate with scientists all over the world. University education is essential for scientists, so it is of the utmost importance that everybody interested in science has a chance to study at university.

We are shocked hearing when universities are attacked and destroyed during wars. As civilian spaces where science is taught, they are the opposite of war. They should be places where young people are exposed to different thoughts and ideas, where the language of science forms a bridge, and where scientific methods are applied to resolve problems.

The war in Gaza and the upheavals in the West Bank are terrifying. All the universities in Gaza have been destroyed. Students and teachers in the West Bank face extreme difficulties to keep the university system running with lectures continuing. We are impressed and encouraged that, even under these very difficult conditions, students want to learn science and spend time to study it.

The Science4Peace Forum aims to support education and teaching even under such difficult conditions. Clearly, support and educational aid is needed in many other places in addition to Gaza and the West Bank. However, as a start, the Science4Peace Forum is launching a donation campaign to contribute to university fees for half a semester for students of physics at An-Najah University in Nablus, so that they can continue their current studies.

- News: Nablus University welcomes this campaign - thanks to A. Bassalat
- campaign will be launched **tomorrow** !
